

Both my wife and I have XM installed in our vehicles, I think having XM Instant Traffic & Weather is a real safety factor and see no reason to limit our receiving this information. I grew up without the television, now my home has four sets for two people, I still enjoy radio and feel that satellite radio is a great marvel. I also feel the government should regulate less things not more and this includes satellite radio and tv. Why should anyone be forced to listen to local just because some lobby wants it for their own monetary reasons? Please do not allow this to happen. I respectfully urge the FCC to reject the NAB's petition 04-160 and to support XM's ability to provide the kind of programming that we demand and deserve.

Sincerely, Charles

W. Hall
